airHome 400

The connected air-to-air heat pump: essential for your air quality

R32
REFRIGERANT

FROST
WASH

SINGLE SPLIT RANGE

FROM 2 TO 7 kW

air

Cooling & Heating

Inspired by you, **airHome** 400 adapts to your interior.

Design for your comfort

Comfortable all year round

Winter or summer, even in extreme temperatures, **airHome 400 ensures an ideal atmosphere in every room**, whether your home is multi-story or single-story.

Performance and energy savings

The airHome 400 offers heating & cooling performance up to A++.

It will help you save energy all year round.

Quick heating & cooling

An air flow rate of up to 663m³/h* for greater heating power and faster .

Still as quiet

With a sound level starting from 20dB(A) during operation, the airHome 400 will blend perfectly into your home and be easily forgotten

How does an air-to-air heat pump work?

 In **winter**, outside heat is transferred indoors to heat the home.

 In **summer**, the heat inside the home is dissipated to the outside.

Inverter Technology:
 Adaptation of power according to demand for a 30% reduction in energy consumption.**

*Up to 5kW
** 20dB(A) sound pressure at low blow speed, at 1 meter from the unit in free field conditions, depending on the model..

** vs a traditional compressor

Designed for your indoor air quality

The air we breathe today, whether indoors or outdoors, affects our lives and our health. Hitachi's technology can help improve your daily life, inside your home, with its 3 unique functions:

99%
OF BACTERIA
& VIRUSES
ELIMINATED*

Anti-virus filter

Diffuses clean and healthy air: thanks to its new anti-virus filter H3N2, tested according to ISO 18184 and JIS L1902 standards, airHome 400 will provide healthy air.

Mold Guard function

Protects against mold & mildew: preventive drying of the heat exchanger for uncompromising cleanliness thanks to the removal of moisture, thus preventing the formation of mold (active drying of 60 minutes).

FrostWash technology

Thanks to the FrostWash* technology, a self-cleaning of the exchanger is performed and the impurities accumulated over time are captured and eliminated. It guarantees the long-term performance

*Tests carried out by Japan Textile Product Quality and Technology Center according to ISO 18184:2019 «Textiles - Determination of antiviral activity of textile products» and by Nissenken Quality Evaluation Center according to JIS L1902:2015 Bacterial Solution Absorption Method and by Kitasato Research Environmental Science (test n°2020-0650).

Easy control of your unit

Via airCloud Go app Wi-fi included as standard

airHome 400 is equipped with wi-fi as standard (box included in the unit) and can be controlled remotely via the airCloud Go application.

- ✓ Compatible with Google Home & Amazon Alexa

Unique Smart Fence function**

airHome 400 automatically adjusts its mode from a user-defined perimeter when you leave or return to your home, thanks to your smartphone's GPS!

Via its remote control with LED backlight

Included as standard (ref. : RC-AGU1EA0G)

Easy to use!

- Indoor temperature management
- Fan speed
- Choice of mode (heating, cooling, etc.)
- Air flow direction

Eco Mode:

Automatically increases (cooling mode) or decreases (heating mode) the set temperature.

** Optional function can be disabled on your smartphone

Put your trust in the experts with Hitachi

Certification

The commercial warranties offered by Hitachi concern the parts making up our machines. They apply subject to installation in compliance with our technical specifications and to regular maintenance of the equipment by qualified personnel. The frequency of maintenance depends on the conditions of use of the equipment and current legislation. Ask your installer for advice.
